

Become an Austral Travel Safety Net Inc.

Club Social Member

The communications club for everybody

Austral Travel SafetyNet Inc. has a mission to provide general and emergency communications support to affected people located in remote and semi-remote areas anywhere in Australia, by using the most technically advanced HF two way radio communication network system available today. Being not for profit all spare funds are directed into technology growth for membership benefit.

If you are a traveller 4x4, caravan, motor home, camper trailer and go out of mobile phone range you have reason to have a HF radio. Austral Travel SafetyNet Inc is primarily a HF radio communications club with four levels of membership with level 4 being for social members without a radio.

Level 4 _____ Social Member:-

As the club has many social events people can join as social members only. This caters for people who do not have a radio at the moment but would like to meet people they could travel with and enjoy events. You receive the CHANNEL CHATTER email magazine and email notification of events and enjoy a community spirit.

This fourth level of membership provides what Austral Travel calls Telcall+ access (which is a name for a group of new communication features integrating smart phone and HF radio.)

Membership at this level, provides member level access to the Out-n-About phone app. This phone app is optional to purchase and as a social member provides position marking from your phone from anywhere in the world where you have data or wifi access. This allows your friends and family to monitor/see your travels on their phones using their Out-n-About app. Your friends do not need to be members of Austral Travel. You can send mailbox text messages from your phone to any club member with a suitable radio, no matter where you are in the world or where they are located in Australia.
