

NEW HF MARINE RADIO SERVICE

HF 2-Way Radio.....21st. Century Connectivity!

Australia and its pristine coastline in particular, has a great many wonderful places to visit where many anchorages and sea routes to get there are often well outside mobile phone coverage.

Introducing Austral Travel Safety Net Inc. - with a suitable HF radio on your vessel and the Austral HF network:-

- Free direct dial interconnect phone calls over the Austral Travel Safety Net HF radio network.
- SMS to any mobile phone in Australia.
- Mark GPS position on a map.
- Send an **emergency call** including GPS location.
- Chat with other vessels/vehicles.
- Friends and family can follow your travels. and return text messages to your vessel with our own Out-n-About phone/tablet app.
- No radio operator proficiency examination required. Any crew member can use the HF.

The modern HF radio offers sailors many advantages but sometimes the formalities and associated costs with a marine radio service can be prohibitive.

With membership in Austral Travel Safety Net you automatically become licensed to transmit and a valued member of the club's HF radio community. You can take comfort in the knowledge that your whereabouts, by integrated GPS coordinate transmission and general communications, provide a virtual security blanket for remote area travellers.

High Frequency (HF) long-range radios on the Austral Travel Safety Net are capable of accessing an extensive Australia-wide base network, enabling general communications and telephone interconnect, within Australian waters, day and night from locations where a mobile phone will not work.

Telcall+ and the Out-n-About phone/tablet app provides family and friends with a map display of your sailing location, no matter where you are around Australia. No need to contact them every day to say you are OK but you can via phone or SMS if you wish.

Emergency calls..... no one wants to be in a situation where you need help in a hurry.

Austral's H.E.L.P. (4357) is possibly the single most important feature of the Telcall+ system available from Austral Travel Safety Net.

A single red button press on suitable HF radio brands and models sends your HELP request with GPS position and can be used for general help or life threatening emergencies. *(to be used as an adjunct to existing marine emergency/distress systems, and is not a replacement)*

How much is your safety and piece-of-mind worth?

Austral Travel Safety Net Inc.
